

W9MK SHACK TOUR

NIDXA Meeting January 11, 2019

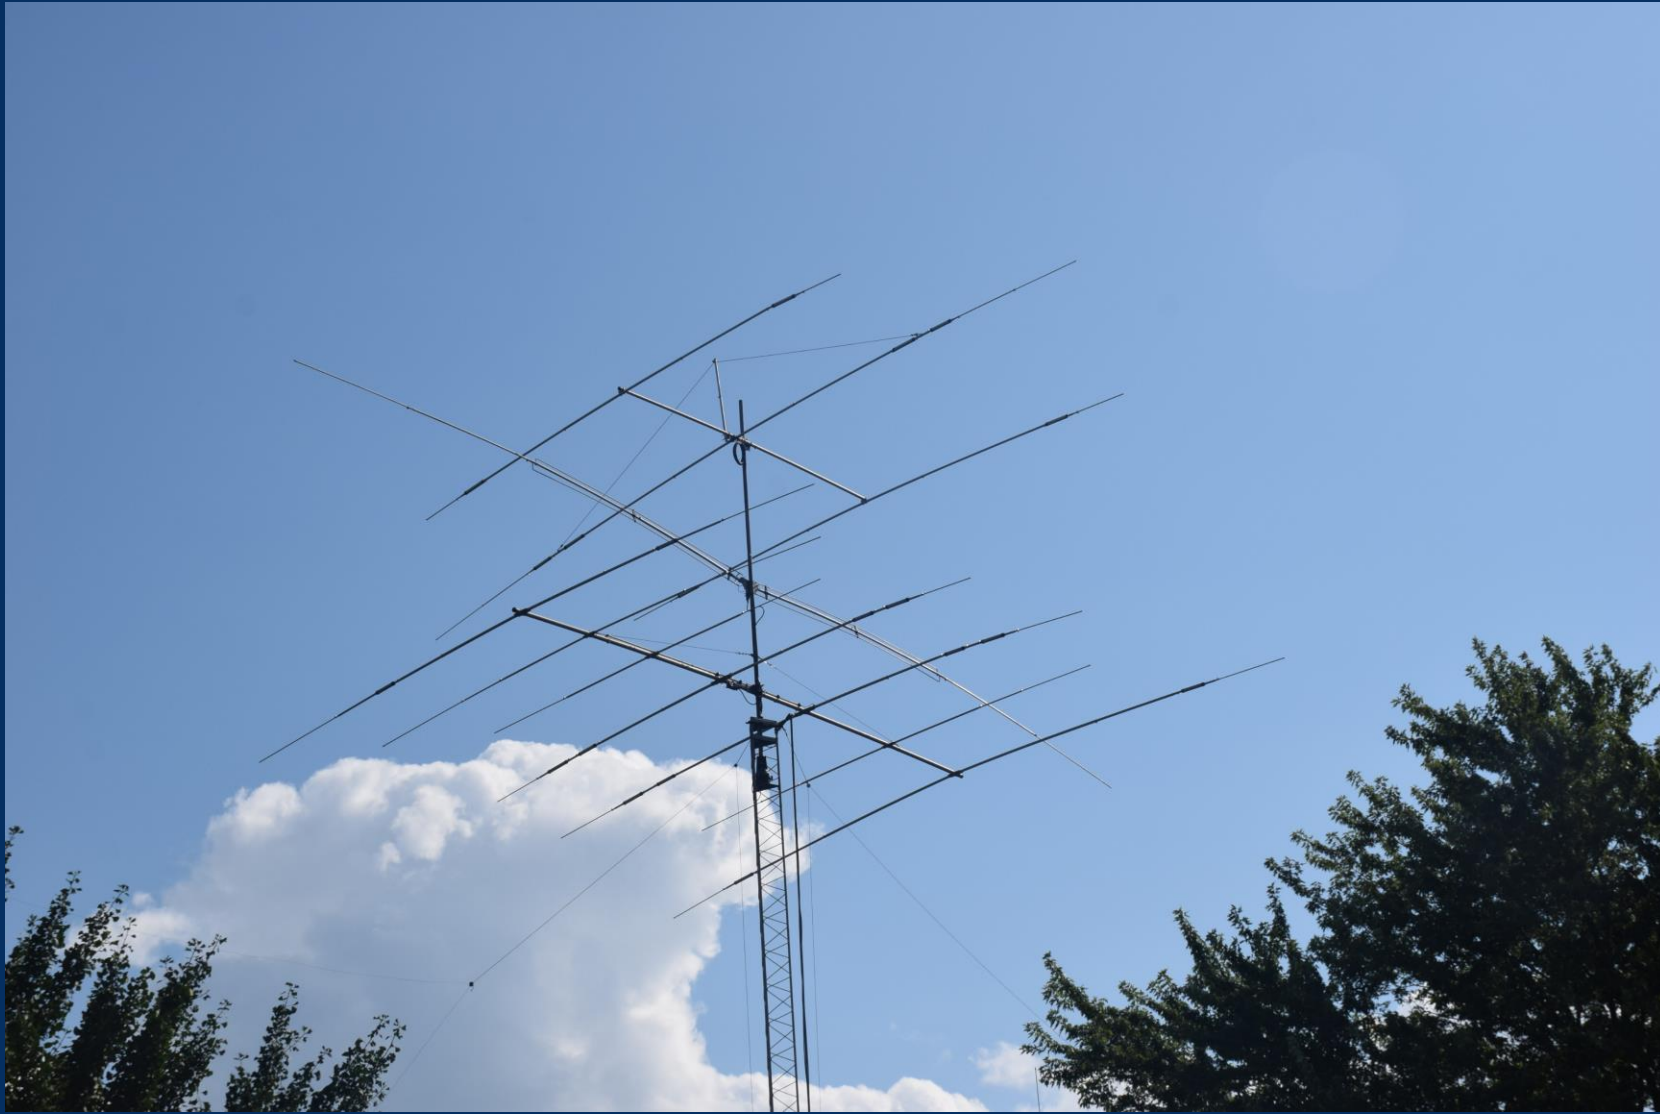

TS-990s MFJ 998 tuner

Alpha 87A, FT-840, SB-610 station monitor

Hy Gain HD54 Crank up Tower, Hy Gain TH-7DXX at 55ft, A3WS at 65 FT KLM 40 Dipole 60 FT

Hy Gain High Tower
18Ht with 30 radials

Hy Gain HD54
Crank-up and
Tilt- Over Tower.
Here I had it
down to work on
the A3WS

Ice and wind storm tilted the A3WS. It is all good now.

Another look at the Ice issues on the A3WS. On element end just hanging by a thread.

I brought the tower home on a boat trailer then moved it around on a pair of these carts and into the back yard.

A come along pulled the tower into place once the concrete had cured.

We dug most of the hole with tractor but the last 1 ½ feet was dug by hand.

Here is a picture with my old 60 foot Rohn 25 tower still in place.

My other hobby is sailing on Lake Michigan. Our boat is "Sologa" a 1974 Yankee 26
